

Macroalgae names

At the bottom of the sheet, look for a two-part Latin name (e.g. *Laminaria andersonii*) written on the herbarium sheet in gray pencil. Type it as written on the sheet. If you can't read the name properly, take a look at the website www.algaebase.org

If the Latin name is on the sheet in gray pencil but you can't read it, even after consulting www.algaebase.org, tick the 'Incomplete transcription' box.

Can't see a Latin name in gray pencil? Then tick the box 'no pencil name'.

Finished!
